## Learning from Cooperative Housing Projects

Monday, 4 December 2023, 16:00  
Gleis 21, Bloch-Bauer-Promenade 22, 1100 Vienna

CO-HOPE (Collaborative Housing in a Pandemic Era), is an international research project involving institutions from Sweden, Austria, Finland, France and Spain. Through theoretically informed applied research on collaborative housing, this project aims at generating potential-oriented recommendations for policymakers, and implementing an international capacity building programme on collaborative housing that tackles the affordability-integration-health nexus.

In the course of a two day working session in Vienna, the project team will share some of the insights gained thus far with the local public.

**The public event „Resilient Urban Development - Learning from Cooperative Housing Projects“** wants to give you an understanding of the project and first results from it. **A panel discussion involving local experts** will reflect on the merits and potential of collaborative housing projects in the wider context of urban development, as well as highlighting lessons learned and room for improvement.

**Please register here for the event:**

<https://urbaninnovation.at/event/resilient-urban-development/>

**Accessibility by public transport:**

D	Hlawkagasse	3 min. walk
6, 11	Gellertplatz	10 min. walk
U1	Keplerplatz	10 min. walk
S1, S2	Quartier Belvedere	15 min. walk

**Hosted by:**

**Robert Temel & future.lab, TU Wien**  
Project Partners AT CO-HOPE

**Organisation:**

**UIV Urban Innovation Vienna GmbH**
